These forward-looking statements relate to future events or future performance and reflect the expectations of management of the Corporation (“Management”) regarding, without limitation, the growth, results of operations, performance and business prospects and opportunities of the Corporation or the trends affecting its industry.

This Annual Information Form may contain forward-looking statements. Forward-looking statements can typically be identified by terminology such as “may”, “will”, “should”, “expect”, “plan”, “anticipate”, “believe”, “estimate”, “predict”, “forecast”, “project”, “intend”, “target”, “potential”, “continue” or the negative of these terms or terminology of a similar nature. Such forward-looking statements reflect current beliefs of Management and are based on certain factors and assumptions as set forth in this Annual Information Form, which by their nature are subject to inherent risks and uncertainties. While the Corporation considers these factors and assumptions to be reasonable based on information available as of February 26, 2020, actual events or results could differ materially from the results, predictions, forecasts, conclusions or projections expressed or implied in the forward-looking statements.

Forward-looking statements made by the Corporation are based on a number of assumptions believed by the Corporation to be reasonable as at February 26, 2020, including assumptions about general economic and political conditions; the state of the global economy and the economies of the regions in which the Corporation operates; the state of and access to global and local capital and credit markets; interest rates; working capital requirements; the collection of accounts receivable; the Corporation obtaining new contract awards; the type of contracts entered into by the Corporation; the anticipated margins under new contract awards; the utilization of the Corporation’s workforce; the ability of the Corporation to attract new clients; the ability of the Corporation to retain current clients; changes in contract performance; project delivery; the Corporation’s competitors; the ability of the Corporation to successfully integrate acquired businesses; the acquisition and integration of businesses in the future; the Corporation’s ability to manage growth; external factors affecting the global operations of the Corporation; the state of the Corporation’s backlog; the joint arrangements into which the Corporation has or will enter; capital investments made by the public and private sectors; relationships with suppliers and subcontractors; relationships with management, key professionals and other employees of the Corporation; the maintenance of sufficient insurance; the management of environmental and health and safety risk; the sufficiency of the Corporation’s current and planned information systems, communications technology and other technology; compliance with laws and regulations; future legal proceedings; the sufficiency of internal and disclosure controls; the regulatory environment; impairment of goodwill; foreign currency fluctuation; the tax legislation and regulations to which the Corporation is subject and the state of the Corporation’s benefit plans. Other assumptions are set out throughout this Annual Information Form. If these assumptions prove to be inaccurate, the Corporation’s actual results could differ materially from those expressed or implied in forward-looking statements

As such, there can be no assurance that actual results will be consistent with forward-looking statements. Except to the extent required by applicable law, the Corporation assumes no obligation to publicly update or revise any forward-looking statements made in this Annual Information Form or otherwise, whether as a result of new information, future events or otherwise. Types of Contracts and Contract Management

The contracts entered into by the Corporation are generally awarded through public calls for tenders, through invitation or by private agreement. The Corporation is generally remunerated through fee-for-service agreements based on hourly rates, a fixed-price negotiated fee, or a fee based upon a percentage of the cost incurred in completing the project. In some instances, the Corporation also takes select lump-sum engineering, procurement and construction (EPC) contracts, which include delivery risks. These contracts, which represented less than 2% of gross revenues in the year ended December 31, 2019, are typically entered into in the energy market sector in circumstances in which WSP's technical understanding of the project enables us to properly manage the risks associated with delivery. Government work is mostly obtained through requests for qualifications and requests for proposals where the offer of services is prepared detailing qualitative factors such as firm experience and qualifications, technical personnel, methodology and approach. Cost of services is sometimes used as

a criterion, with the weighted importance varying significantly from client to client. In addition, qualification-based criteria are often used to select engineering services firms, with fees being negotiated according to government decrees, industry standards or client fee schedules.

Contract value and scope vary from small mandates on an ad hoc basis to large, multi-year assignments. The Corporation's resources and systems capabilities allow it to tackle projects requiring specific and diverse expertise and presenting various levels of complexity.

Some of the Corporation's contracts, regardless of type, may operate under joint ventures or other teaming arrangements. In accordance with industry practice, most of our contracts are subject to termination at the discretion of our client. In such situations, our contracts typically provide for the payment of fees earned through the date of termination and the reimbursement of costs incurred including demobilization costs.

The Corporation is not dependent on any one client for its business. In the year ended December 31, 2019, no single client or project represented more than 10% of the Corporation's consolidated revenues or trade receivables.

In-house project management is an important aspect of project delivery. Mandates are assigned to a project manager responsible for the technical delivery of the assignment, the contractual and administrative follow-up, quality control and client satisfaction. The Corporation has systems in place to manage performance with respect to budget and schedule on a continuous basis. These systems allow project managers to monitor personnel utilization on projects and track milestones and deliverables.

Competition

The Corporation operates in highly competitive markets and competes with a large number of regional, national and international companies. Certain of these competitors have greater financial and other resources than the Corporation. Others are smaller and more specialized, and concentrate their resources in particular areas of expertise or geographic areas. The extent of competition varies according to the particular market, industry, geographic area and project type. The degree and type of competition faced by the Corporation is also influenced by the type and scope of a particular project. Clients make competitive determinations based upon qualifications, experience, performance, reputation, technology, customer relationships and ability to provide the relevant services in a timely, safe and cost-efficient manner.

The Corporation believes its main competitive differentiators are: its reputation, experience, breadth and quality of services, technical proficiency, multidisciplinary expertise, local and international presence, global reach, decentralized operations model, integrated service delivery, added value of services and global market leadership position. We believe our differentiators allow us to compete effectively and remain a leader among pure-play consulting firms.

Research and Development

WSP conducts research and development for the specific project requirements of certain clients. Research and development is conducted in several sectors.

Employees

As of December 31, 2019, the Corporation had approximately 50,000 employees, including engineers, advisors, technicians, scientists, architects, planners, surveyors, and environmental specialists, as well as other design, program and construction management professionals. As of December 31, 2019, employees predominantly in the Nordics and Continental Europe, representing less than 13% of the Corporation's total employees and the vast majority of its unionized employees, were covered by collective bargaining agreements. The Corporation believes that it has good relations with its employees, having developed a culture focused on empowerment and the ability to adapt to a constantly changing environment and growth. Over the past years, the Corporation has been benchmarking and maintaining competitive compensation packages, strengthening its internal communication tools, emphasizing teamwork, creating career advancement opportunities throughout its network of offices and providing professional development support.

The Corporation is a knowledge-based organization and therefore continuously seeks talented and skilled professionals in its practice areas. Since the supply of qualified candidates is sometimes limited, the Corporation uses various recruitment

strategies to address staffing needs. Examples of recruitment strategies include an employee referral bonus program, website job postings, career fairs, student programs, and global mobility opportunities.

Health, Safety and Security

The Corporation has to comply with applicable health and safety laws and regulations and is committed to providing its employees and others who may be affected by its activities with a healthy, safe and secure environment.

With employees located all over the world, it is essential that the Corporation takes a robust approach to health, safety and security.

We believe health, safety and security remain “front of mind” for employees by means of robust processes and procedures in all regions, supported by regular communications and mandatory training. In this regard, the role of the Corporation’s Global Head of Health, Safety & Security has developed arrangements which promote a positive health, safety and security culture. To achieve this, the Global Head of Health, Safety & Security has the support of the global and regional leadership teams who ensure the Corporation provides visible and tangible leadership, wherever we operate in the world.

The Corporation’s commitment in this regard is outlined in its Health and Safety Policy and its Expectations for Health and Safety Management, which establish a framework for its health and safety program developed from internationally recognized standards. Our overseas security program comprises processes and procedures, developed by industry experts, which ensure our employees have 24/7 support wherever they are deployed in the world.

Sustainable Development

The Corporation is taking strides to ensure sustainability is embedded in its operations, decision-making and financing. As the Corporation continues to grow, it will continue to increase the value it offers its shareholders, clients, employees and communities through its approach to sustainability, which is based on the following pillars:

- The Corporation uses the growth of the sustainable economy as an opportunity to grow new markets and commercial opportunities.
- When relevant, the Corporation takes into account possible future needs or requirements in the performance of its services to its clients. This can help reduce our clients’ environmental impact over the lifecycle of their assets.
- The Corporation manages its own environmental and social impact.
- The Corporation seeks to be an active participant in the communities in which it operates.
- The Corporation links its financing to its sustainability goals to further strengthen its commitment to deliver on its sustainability ambitions outlined in its 2019-2021 Global Strategic Plan.

Insurance

The Corporation carries different insurance policies, including professional errors and omissions liability insurance, subject to deductibles, limits and exclusions which are customary in the Corporation’s industry. The Corporation also carries a general and an umbrella liability policy. The Corporation takes a proactive approach to risk management, encouraging ongoing project director training and problem resolution approaches to potential conflicts.

Risk Factors

A discussion of the risks to which WSP is subject is presented in section 20, “Risk Factors” of the Corporation’s MD&A, which is incorporated herein by reference. The Corporation’s MD&A is available on SEDAR at www.sedar.com and on the Corporation’s website at www.wsp.com under the “Investors” section. See the section entitled “Forward-Looking Statements” on page 3 of this Annual Information Form for a discussion of risks associated with forward-looking statements.

Pierre Shoiry is not independent as he was the President and Chief Executive Officer of WSP until October 31, 2016 and, up until March 31, 2018, had also been working with the Chief Executive Officer and the Management team in respect of acquisition activities and other strategic opportunities. Pre-approval Policies and Procedures

The Audit Committee has the authority to pre-approve all non-audit services to be provided by the external auditor to the Corporation and any subsidiary thereof. To this effect, the Audit Committee may adopt specific policies and procedures that may include the delegation by the Audit Committee to one or more independent members of the authority to pre-approve such non-audit services, provided that such pre-approval be reported to the Audit Committee at its next regularly scheduled meeting.

Cease Trade Orders, Bankruptcies, Penalties or Sanctions

Corporate Cease Trade Orders or Bankruptcies

To the knowledge of the Corporation, none of the directors or executive officers of the Corporation is, or within ten years before the date hereof has been, a director, chief executive officer or chief financial officer of a company (including WSP) that: (i) was the subject of a cease trade or similar order, or an order that denied the relevant company access to any exemption under securities legislation that was in effect for a period of more than 30 consecutive days while the director or executive officer was acting in the capacity as director, chief executive officer, or chief financial officer, or (ii) was subject to a cease trade order or similar order, or an order that denied the relevant company access to any exemption under securities legislation that was in effect for a period of more than 30 consecutive days, that was issued after the director or executive officer ceased to be a director, chief executive officer or chief financial officer and which resulted from an event that occurred while that person was acting in that capacity.

In addition, to the knowledge of the Corporation, except as described below, no director or executive officer of the Corporation, or any of their respective personal holding companies, nor any Shareholder holding a sufficient number of securities to affect materially the control of the Corporation: (i) is, or within ten years before the date hereof has been, a director or executive officer of any company (including WSP) that, while that person was acting in that capacity, became bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency or was subject to or instituted any proceedings, arrangement or compromise with creditors or had a receiver, receiver manager or trustee appointed to hold its assets, or (ii) has, within ten years before the date hereof, become bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency or become subject to or instituted any proceedings, arrangement or compromise with creditors, or had a receiver, receiver manager or trustee appointed to hold the assets of the director, executive officer or shareholder. In April 2012, Ms. Nørgaard was appointed chairperson of the privately held Danish company E. Pihl & Son A.S., a general contractor operating in both the Nordic markets as well as abroad. Prior to Ms. Nørgaard's involvement, E. Pihl & Son A.S. was already in financial difficulty and in August 2013, E. Pihl & Son A.S. filed for bankruptcy.

Penalties or Sanctions

To the knowledge of the Corporation, except as described below, no director or executive officer of the Corporation, or any of their respective personal holding companies, or Shareholder holding sufficient securities of the Corporation to affect materially the control of the Corporation has (i) been subject to any penalties or sanctions imposed by a court relating to securities legislation or by a securities regulatory authority or has entered into a settlement agreement with a securities regulatory authority; or (ii) been subject to any other penalties or sanctions imposed by a court or regulatory body that would likely be considered important to a reasonable investor making an investment decision. On November 8, 2019, Mr. Shoiry reached a settlement with the Ordre des ingénieurs du Québec and entered into a plea recognizing that he did not put in place the necessary measures to supervise the application of internal rules related to the bidding for public contracts and financing of political activities before 2010. He also paid a fine of \$75,000 in the aggregate.

Conflicts of Interest

To the knowledge of the Corporation, no director or officer of the Corporation has any existing or potential material conflicts of interest with the Corporation or any of its subsidiaries.

Interest of Management and Others in Material Transactions

To the knowledge of the Corporation and based on information provided to it by its directors and the executive officers, there were no (i) directors or executive officers, (ii) persons that beneficially own, or control or direct, directly or indirectly, more than 10% of the Shares, or (iii) any associate or affiliate of persons referred to in (i) and (ii), who has or has had any material interest, direct or indirect, in any transaction within the past three years or in any proposed transaction that has materially affected, or is reasonably expected to materially affect, the Corporation or any of its subsidiaries.

Legal Proceedings and Regulatory Action

The Corporation is currently facing legal proceedings for work carried out in the normal course of its business. The Corporation takes out a professional liability insurance policy in order to manage the risks related to such proceedings. Based on advice and information provided by its legal advisers and on its experience in the settlement of similar proceedings, Management believes that the Corporation has accounted for sufficient provisions in that regard and that the final settlement should not exceed the insurance coverage significantly or should not have a material effect on the financial position or operating results of the Corporation.

As a government contractor, the Corporation may be subject to laws and regulations that are more restrictive than those applicable to non-government contractors. Government scrutiny of contractors' compliance with those laws and regulations through audits and investigations is inherent in government contracting, and, from time to time, Management receives inquiries and similar demands related to the Corporation's ongoing business with government entities. Since 2012, the Corporation has been the object of investigations in several regions within the Province of Québec. Such investigations have not given rise to any charges against the Corporation. During the course of 2017, the Corporation, in connection with the voluntary reimbursement program established pursuant to Bill 26, An Act to ensure mainly the recovery of amounts improperly paid as a result of fraud or fraudulent tactics in connection with public contracts, enacted in April 2015, settled with certain municipalities and satisfied its obligations under such settlements. On March 13, 2019, the Québec Superior Court approved a settlement between the Corporation, Canada's Competition Bureau and Director of Public Prosecutions. As a result of the settlement, the Corporation will not face any prosecution in connection with the award of municipal infrastructure contracts in Québec between 2002 and 2011.

In July 2015, Louis Berger International, Inc., a subsidiary of Berger Group Holdings, Inc., entered into a three-year deferred prosecution agreement ("DPA") with the U.S. Department of Justice ("DOJ") for self-reported *Foreign Corrupt Practices Act of 1977* issues involving inappropriate payments made to foreign government officials in 2010 and prior by employees in the Middle East, India and Asia. In accordance with the terms of the DPA, Louis Berger entered into a three-year integrity monitoring agreement with the DOJ as well as with several state and local authorities. At the time of the closing of the Louis

Berger Acquisition on December 18, 2018, the matter had been fully resolved with the U.S. government, associated monitorships were successfully completed or lifted, and the U.S. DOJ had withdrawn all associated criminal charges. Currently, there remain ongoing proceedings in India related to the same facts as those addressed by the U.S. DOJ in the now-ended 2015 DPA and associated monitorships.

On December 27, 2019 over 100 plaintiffs filed suit in the US District Court for Washington, DC against a number of US government contractors, including The Louis Berger Group Inc. and Louis Berger International Inc. (collectively, "LB"), alleging that they had violated the Anti-Terrorism Act by making payments to private security firms with knowledge that those firms were affiliated with the Taliban. While this lawsuit is in its preliminary stage, the Corporation believes that LB has a strong defense to offer and it intends to vigorously defend the allegations.

The transfer agent and registrar for the Shares is AST Trust Company (Canada) at its principal offices in Montreal, Toronto, Vancouver and Calgary.
